Objective

"Motivated third-year engineering student seeking a backend development role to leverage my skills in programming and web development. I aim to contribute to innovative solutions while further developing my technical expertise in a collaborative environment."

Education

- B.M.S College of Engineering , Bangalore.** 2022-26
Information Science Engineering (B.E)
9 cgpa

Skills

- As a third-year engineering student, I have a strong foundation in programming languages, including C, C++, and Java. In web development, I am skilled in HTML, CSS, JavaScript, and jQuery, with hands-on experience in backend technologies such as PHP and MySQL, and implementing PHP with AJAX. Currently, I am focusing on advancing my expertise in backend development using frameworks and technologies like Django, the MERN stack, Ruby, React.js, and Node.js, striving to expand my skill set and proficiency in building robust, scalable web applications.

Projects

- AIRLINES RESERVATION SYSTEM**
Developed a comprehensive Airlines Reservation System that integrates both frontend and backend functionalities. Utilized HTML, CSS, JavaScript, jQuery, and Bootstrap for a responsive and user-friendly interface, while implementing PHP and MySQL for robust backend operations. This project effectively manages flight bookings, user accounts, and transaction processing, demonstrating my ability to create efficient and scalable web applications.

Languages

- Fluent in English, Hindi, and Marathi, allowing for effective communication in multicultural settings. This multilingual proficiency enhances my ability to collaborate with diverse teams and engage with a wide range of stakeholders. My language skills support clear communication, making me adaptable in various professional contexts.
